Step 2:

- First, I typed the “pwd” command to view my current directory, which was my home directory.
- Secondly, I listed all the files inside my home directory, there was only 1 file (space in this filename)
- Thirdly, since I had to view the file which included spaces, I had to use parentheses around the file.
- Next, I used the cat command following the file with parentheses around it to view the contents in the file.
- Lastly, I copied the password to use it for the next level.

bandit2@bandit: ~

```
bandit2@bandit:~$ pwd
/home/bandit2
bandit2@bandit:~$ ls
spaces in this filename
bandit2@bandit:~$ cat "spaces in this filename"
