

Bandit OTW Walkthrough Write-Up

Level : 0

Setting Up & Connecting:

1. I installed PuTTY.
2. I typed the correct IP address and Port number and saved it as a saved session for future levels.
3. Ran the saved Session
4. I used the ls command to list all folders in my current working directory, then I used the cat command to open and read the file "readme"

A screenshot of a terminal window titled 'bandit0@bandit: ~'. The terminal shows the following commands and output:

```
bandit0@bandit:~$ ls
readme
bandit0@bandit:~$ cat readme
NH2SXQwcBdpmTEzi3bvBHMM9H66vVXjL
bandit0@bandit:~$
```

The terminal window has a black background with white text. The prompt 'bandit0@bandit:~\$' is shown at the start of each line. The output of the 'ls' command is 'readme'. The output of the 'cat readme' command is a long alphanumeric string: 'NH2SXQwcBdpmTEzi3bvBHMM9H66vVXjL'. The cursor is visible at the end of the last line.

5. I copied the password shown above to use it as the password login for the next level.
